ABSTRACTED-PUB-NO: SE 501759B

BASIC-ABSTRACT:

A support component (8) is provided, and one is also provided for the boat stern (9). The frame (4) of the vehicle in a horizontal plane has a U-shape and the arm outer part works in conjunction with the wheels (6, 7) belonging to the rear load supporting axle (6a). An inner part of the arms has a connecting part which works in conjunction with the wheels (5) belonging to the front

steerable axle.

The support component (8) for the boat bow is raisable and lowerable by means of two parallel orientated thrusters in the form of hydraulically activatable first piston-cylinder arrangements (13, 13'). The support component for the boat stern (9) is raisable and lowerable by two parallel orientated, hydraulically activatable second piston-cylinder arrangements (14, 14').

ADVANTAGE - Provides a simple fixture for a boat with supports fore and aft.

CHOSEN-DRAWING: Dwg.1/6
